

# Website Care Plans

You take care of your business, and we will take care of your WordPress website

from \$150  
per month

- **Daily backups** – we run regular backups of your website and keep a history of 30 days or more should we ever need to go back to an older version of the website.
- **Security watch** – we track any attempted site attacks. We scan for malware and we verify your site is clean. To head off hackers, we update plugins that have security holes as soon as we discover a problem.
- **Traffic statistics** – we help you connect to your Google Analytics & implement tracking.
- **Core & plugin updates** – we update WordPress, and plugins on a regular basis. If we find an issue we roll back the update to the latest backup and troubleshoot any problems. If a plugin cannot be updated because of a conflict with your site, we will notify you with options.
- **Small site fixes** – if we find a broken image or a broken link, or some other kind of problem that is a quick fix, we will just take care of it for you.
- **Access to premium paid plugins** – as a client of our Website Care Plan we pay for and include a number of premium paid plugins on your website. This can save you hundreds of dollars in yearly fees.
- **Performance** – we check your site for performance issues. If we find problems that slow your site down we will let you know what needs to be done to fix the issue.
- **Optimizing database and removing spammy comments** – we clean up spammy comments from your site and run a database optimization program to keep everything running smoothly.
- **ADA compliance** - we review page content for ADA issues and keep you updated on what needs to be fixed.
